## Colour pallet

In the beginning I have been looking at colours that have been used by popular sites like:

- [www.rol20.com](http://www.rol20.com)
- [www.dndbeyond.com](http://www.dndbeyond.com)

In my colour pallet I have chosen a more blue/ cold pallet so that it contrast with the normal black with red colours of the other websites so the website will stand out from the rest.

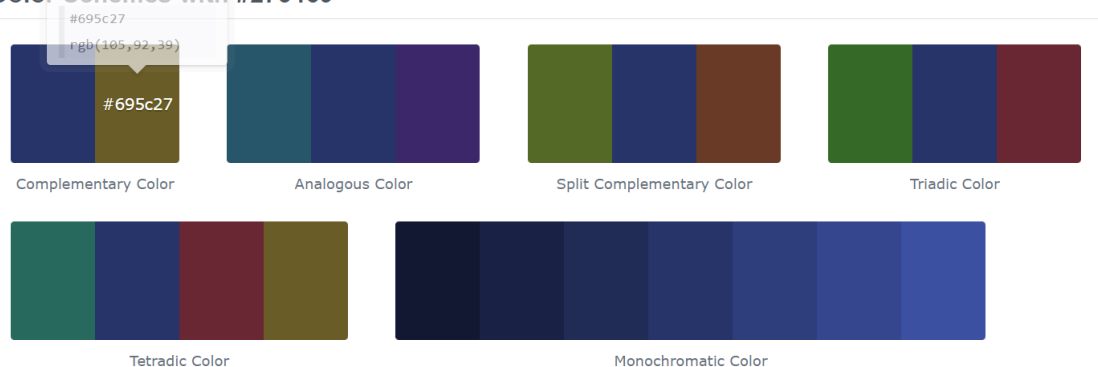

Hex codes of the colours I want to use: (left to right)

- 30343F
- FAF AFF
- E4D9FF
- 273469
- 1E2749

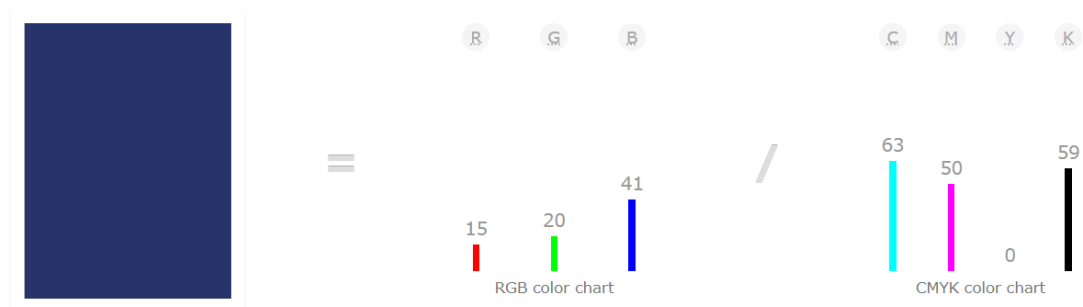

This is some colour research I have done to see what colours make natural pairs with the main colour I want to use for my application.

### Color Schemes with #273469

In a RGB color space, hex #273469 is composed of 15.3% red, 20.4% green and 41.2% blue. Whereas in a CMYK color space, it is composed of 62.9% cyan, 50.5% magenta, 0% yellow and 58.8% black. It has a hue angle of 228.2 degrees, a saturation of 45.8% and a lightness of 28.2%. #273469 color hex could be obtained by blending #4e68d2 with #000000. Closest websafe color is: #333366.
